Abstract

In 2015 the second conference "Cloud Storage Deployment in Academics" took place. Interest regarding this issue was again high and topics established in 2014 like data security and scalability were complemented by new ones like federations or technical integration in existing infrastructures. This is caused by the advances in the establishment of cloud-based storage systems. This publication contains the contributions of the conference "Cloud Storage Deployment in Academics 2015", which took place in may 2015 at TU Berlin. (HRK / Abstract übernommen)
